The NBS for water management market is upcoming. IRIDRA Srl, an Italian engineering firm specialised in sustainable water management, has been shifting over the last years from conventional schemes with end-of-pipe solutions to a Circular Economy and Ecosystem Service-based scheme, undertaking numerous R&D activities to experiment with new applications of Nature-Based Solutions (NBS) to be transferred to the market. This is bringing a lot of growth opportunities to the company, that has designed over 500 treatment wetlands and has delivered 120 scientific publications in the last 20 years.
