

Name of the NBS

Description of the NBS: Goals of the NBS and location (city)

- Example: *The Lagoon of Meira (Oleiros, Coruña) next to a huge chimney that was part of an old ceramic factory, the lagoon of Mera is an example of nature restoration of an abandoned industry area.*
- *The nature intervention aimed to recover the space left by the industrial extraction of clay and today it is populated with different species of birds and is known as the Parque da Lagoa. The lagoon of Mera is a natural space that hosts a riverbank forest with a great variety of plants and animals.*
- *Besides, the lagoon is a natural leisure area to walk and spare time both children and elderly population. The perimeter of the lagoon is surrounded by walking paths, areas to rest, eat in the picnic area or simply observe the geese, swans or other almost thirty birds that inhabit the area.*
- *Also different species of trees such as alders, willows, birches or oaks have been conserved in the area.*

Impacts and lessons learned

- Main impacts

- *Example: to this day, almost all the people who come to the Mera lagoon monitor and protect the natural landscape.*
- *The Lagoon of Meira is populated by domestic native ducks and geese, swans, cormorants, herons and exotic species.*

- Elements which contributed to success

- Main challenges encountered

Example: Few years ago several vandalism issues put in risk the biodiversity of the lagoon as well as the attractiveness of the area for people and children...
