life and  
livelihoods

# International Union for Conservation of Nature

*70 years of vision and impact*

16 May 2018, A Coruña, Spain

*“Benefits of ecosystem  
restoration: Coastal and  
Land case studies”*

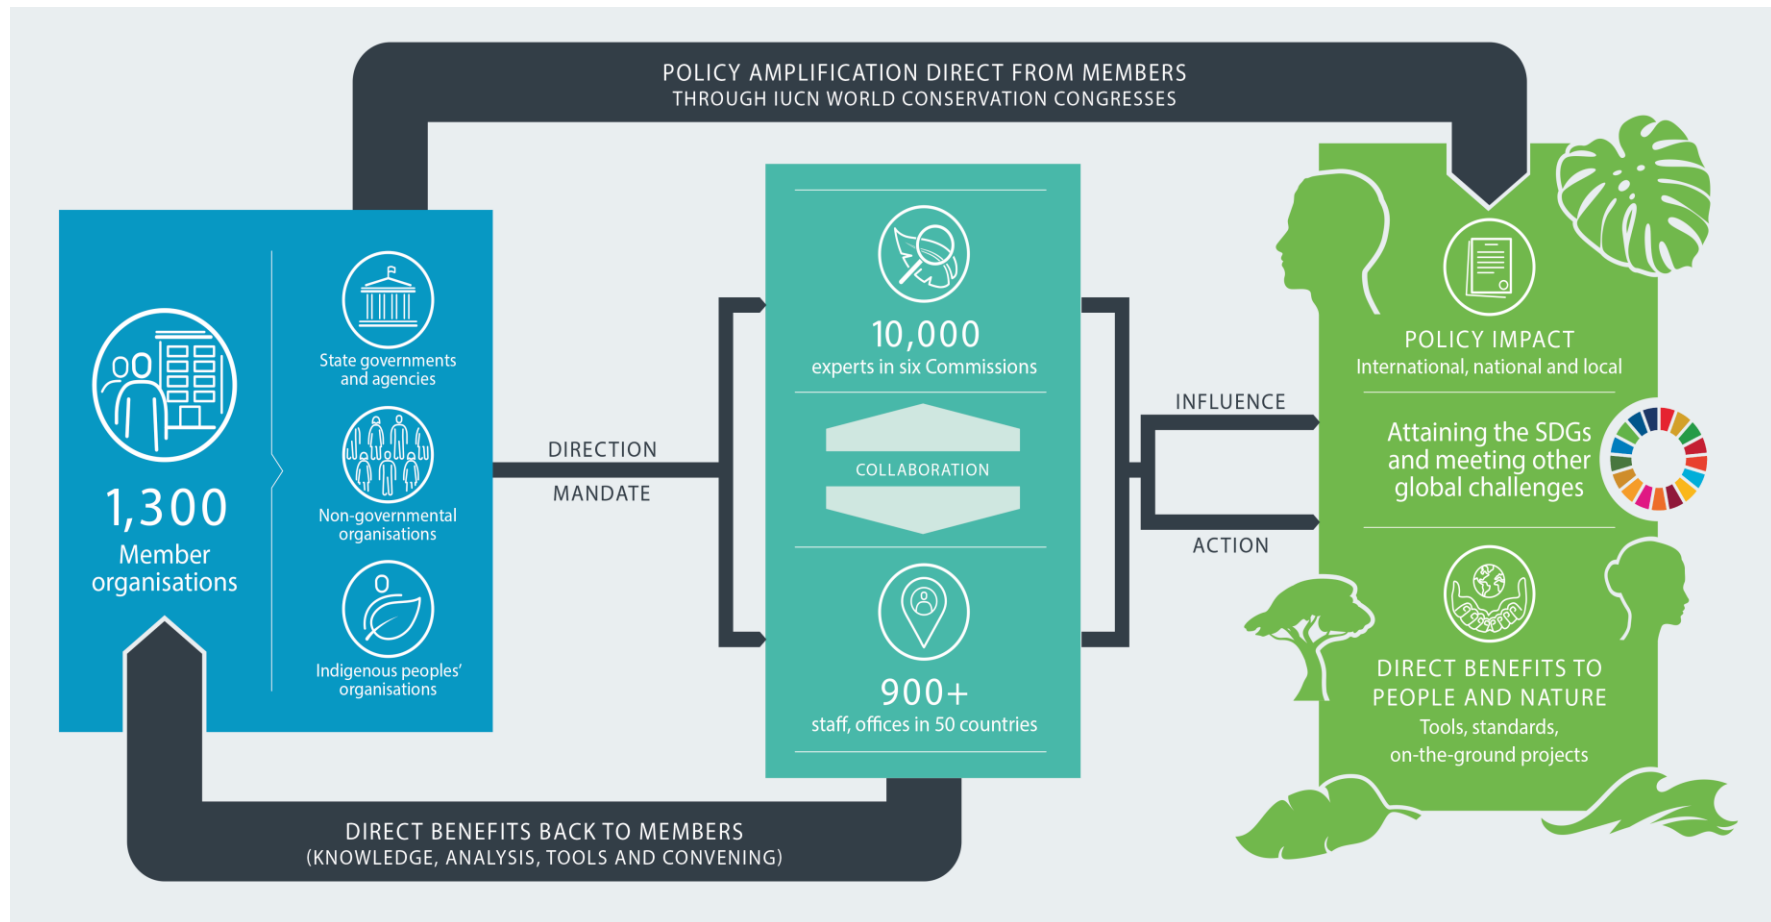

- **Verónica Ruiz**

IUCN Research Assistant

Global Ecosystem Management Programme

# The world's largest environmental network

# Defining our work

## 1. Ecosystem restoration approaches

## 2. Issue-specific ecosystem-related

## 3. Infrastructure-related approaches

## 4. Ecosystem-based management

## 5. Ecosystem protection approaches

Community-based  
Ecological Mangrove  
Restoration  
(CBEMR)*

# Mangrove restoration

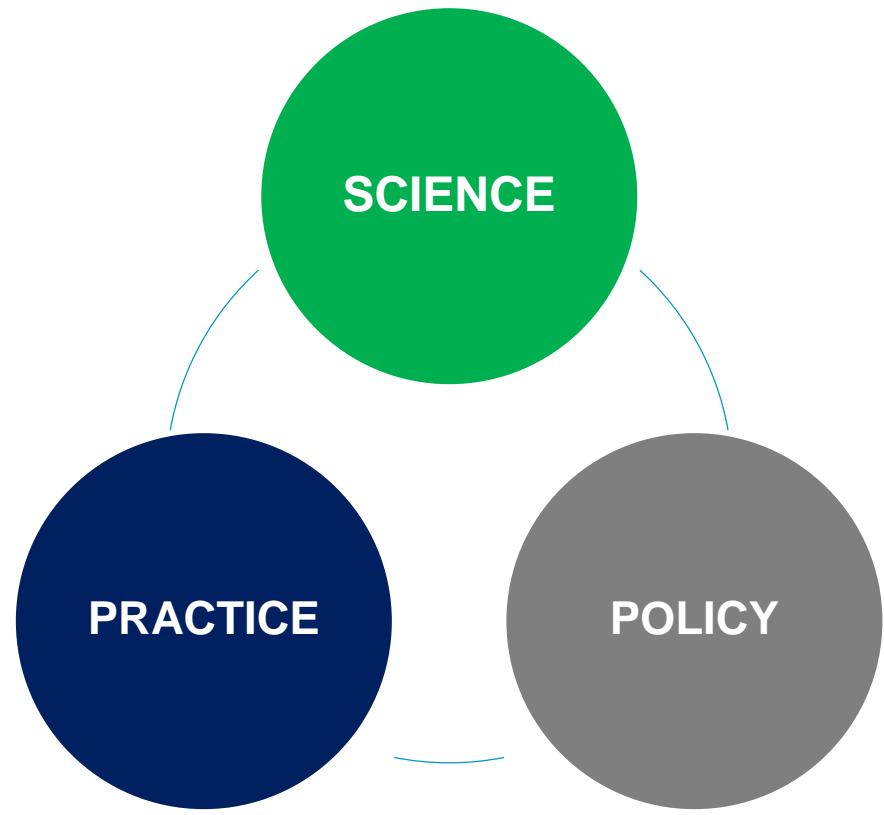

ER

Eco-DRR

INTERNATIONAL UNION FOR CONSERVATION OF NATURE

# Ecosystem Protecting Infrastructure and Communities

# Challenges

- Socio-economic valuation of restored mangroves
- Include all pertinent policy actors

**Science-Practice and  
Policy approach**

- High level of failures

# Monitoring systems

June 2015

## Quadrat analysis

## Time-lapse photography

August 2017

# Benefits

- Local knowledge inclusion
- Restored Mangrove species biodiversity
- Employment local communities
- Enhanced coastal protection and food provision
- Policy:
  - Established stakeholder dialogue platform
  - Promoting Eco-DRR

# Lessons learned

- Awareness about CBEMR and Eco-DRR
- Implementing hydrological restoration
- Successful Advisory Committee

- Identifying unsuccessful practices, e.g. silvofisheries

*Rwanda : Forest  
Landscape  
Restoration as a  
national priority*

# Forest Landscape Restoration

- Land conversion and overexploitation
- Conducting **ROAM** Assessment  
 (Restoration Opportunities Assessment Methodology)
- Bonn Challenge Barometer of progress

# Challenges

**2M** ha into  
restoration  
**by 2020**

- Policy engagements:
  - Vision 2020
  - Green Growth and Climate Resilient Strategy
- Insufficient coordination /shared vision
- Knowledge and awareness:
  - Restoration
  - Management
- Unsustainable Land Use practices

# ROAM Recommendations

1. Improve coordination
2. High quality planting stock
3. FLR increasing demand
4. Prioritise FLR projects
5. Improve financing resources

# Benefits

1. Joint Sector Working Group
2. Tree Seed Centre
3. Agroforestry, Silviculture, Reforestation
4. Restoration pilot projects
5. Improve financing resources

National Climate and Environment Fund  
Rwandan Development Bank

INTERNATIONAL UNION FOR CONSERVATION OF NATURE

# Lessons learned

- Role of champions
- National context
- Economic considerations
- Collaboration
- Pilot activities

*Craig Beatty/IUCN*

# How to engage with IUCN

- Using the Red List of Ecosystems methodology
- Developing a protocol for NbS design
- Establishing a standard for NbS
- Expanding network of NbS people and work
- Joining Commission on Ecosystems

IUCN  
Red List of Ecosystems
